COPARTNET

COPARTNET.COM ELECTRONICs LTD.

Our Service Features

Design & integration -

- Tooling and assembly fixture design, includes related PCBA and integration with peripherals

Sourcing -

- Equivalent substitution recommendations and Sourcing
- Compare the best quality and price from various material suppliers
- Procurement server - Inquiring about us is equivalent to inquiring about dozens of factories through our purchasing system.

Value-Added -

- Quick turn-around time from quotation to production delivery.
- Cost Reduction/Cost Avoidance through process and product improvements.
- Assist customers in comparison and select screening to find the best fitted alternatives
- Making an inquiry to us is equivalent to making an inquiry to dozens of factories through our procurement system at the same time

Online Store - (www.5ghome.com)

- Synchronized with our warehouse.
- A small amount of supply can be combined for bulk shipment
- Easy access, Just register your email and self-set password to start inquiry or shopping

Package -

- Your logo, your packaging, on your products

COPARTNET

COPARTNET.COM ELECTRONICS LTD.

Scope of Our Competency/Service

1. Custom product integration - We assist customers in mold development, testing, sourcing components, design modifications, QA specifications, certification, production, packaging, and shipping.
2. Mold resource allocation - It is impossible for a single factory to have the molds required for all assembly specifications, otherwise a high gross profit rate is required to quote externally. We assist in integrating mold production from various factories, and as much as possible save customers on mold development costs.
3. Alternative product sourcing plans (sourcing electronics) – Through procurement systems and links with thousands of component vendors, we help customers find high-quality alternative parts to save costs and meet delivery times.
4. Convenient quotation procurement - Thousands of products are available for reference selection, with small-scale purchases (5ghome.com), large-scale quotations (copartnet.com), as well as custom products having a dedicated link e-form for more comprehensive and efficient quotations.
5. Thousands of inventory items available for selection - Flexible MOQ, self-operated e-commerce website, www.5ghome.com, offers a variety of new and old cables, adapters, electronics, and other product types, with the quantity only increasing. We welcome cross-border integration (small & large scale orders) for bulk shipments.

COPARTNET

COPARTNET.COM ELECTRONICS LTD.

Scope of Competency/Service Details

- Our custom cable capabilities have crossed over to the following fields: wire harness, communication, panel cables, computer cable (IDC/Flat/FFC Cable), display D-SUB cables, button switch/DC cable, USB-C, A/V, RF, chargers, adapters, and any weak/DC power cables processing or mold development w/ pcba in soldering or crimping type. We try our best to provide standard cables, customized cables, searching the best alternative parts for product-integration (assistance bidding) and QC service. If our OEM cost is lower than your current supplied, this is indeed a solution worth considering.
- For general standard specifications such as cable/electronics inquiries, please join the membership (input your email and password only) to start the inquiry function; For inquiries about customized product requirements, Please refer to the following website for inquiries about customized product requirements (on www.copartnet.com )...its formatted e-form allows customers to better understand all possible requirements during the customized specification inquiry process.
- In addition, our procurement database system, with strong connections with various electronics/alternatives manufacturers all over Taiwan and China, is definitely the best problem-solving partner to provide you with custom cable solutions. The mechanism also timely supplies the customer's needs for other electronic materials. In addition to helping customers save material costs, it can also be integrated into one shipment with other small-volume shipments of different products (our on-line shop, www.5ghome.com) and bulk goods of cable/adaptor, etc.

Product Index

- PCBA Design and its peripheral Electronics/Cable Integration
 - HDMI cable /adapter
 - Type-C cable /adapter
 - Communication cable /parts(for device)
 - VGA/DVI cable / adapter/ device
 - Display Port/ Mini Display Port
 - USB cable/ adapter
 - Computer adapter/ cable
 - AV cable / adapter(for device)
 - IC &Electronics/Components
 - Customized cable/ adapter
- 
- A collage of various electronic cables and adapters. It includes a black L-shaped USB Type-C connector, a black HDMI connector, a green printed circuit board (PCB) with multiple colored wires connected to it, a black cable with a red strain relief, a black cable with a silver DisplayPort connector, a black cable with a gold-plated USB-A connector, and a black cable with a gold-plated USB-C connector. The items are arranged in a scattered manner against a white background.
